

PRATHAM DHOBI

JAVA BACKEND DEVELOPER

+91 9313427464 | [Mail](#) | [Linkedin](#) | [Github](#)

4th year Information Technology student with expertise in web development and software engineering. My areas of expertise are Java 1.8, Spring boot, REST API, Microservices, MySQL, and MongoDB.

TECHNICAL SKILLS

Java 1.8, Spring MVC, Spring Boot, Spring Security, Spring REST, Microservices, Hibernate, Maven, Java Enterprise Edition (JEE), MySQL, MongoDB, Oracle Database, REST API, React.js, Bootstrap, Git, HTML5, CSS3, Javascript, Tomcat, Postman.

PROFESSIONAL EXPERIENCE

Toshal InfoTech Pvt Ltd - Internship

Jun 2024 - Aug 2024

React.js Developer

- Built reusable UI components that can be used across multiple projects.
- Utilized React Router to implement navigation within the application.
- Integrated external APIs into the application to fetch data from remote servers.
- Optimized performance of React applications by implementing code splitting and virtual DOM techniques.

PROJECTS

ECOMMERCE WEB APPLICATION | [Link](#)

Nov 2024 - Dec 2024

Technology : Spring MVC, Bootstrap, MySQL, Git

- Developed an e-commerce web application using Spring MVC, featuring OTP-based email authentication to enhance user security.
- Integrated a secure payment gateway to streamline transactions, ensuring a smooth checkout experience for users.
- Implemented managed user sessions, allowing personalized browsing and shopping experiences within the application.
- Built robust features for a seamless e-commerce experience, from secure login to payment processing and session management.

ZOMATO API - Food Ordering System | [Link](#)

Dec 2024 - current

Technology : Spring Boot, Hibernate, MySQL, REST API, Git, Postman

- Developed a food order application using Spring Boot with a RESTful API for seamless client-server communication.
- Designed and implemented APIs for managing customers, restaurants and menus with efficient CRUD operations.
- Utilized Hibernate for Object-Relational Mapping (ORM) to streamline database interactions with MySQL.
- Implemented email-based authentication to enhance user account security.
- Added session management for personalized user experiences and efficient order tracking.
- Planned future enhancements, including integrating Spring Security with JWT for robust authentication and adding payment services for secure transactions.

EDUCATION

Bachelor of Engineering (B.E.) - Information Technology

Aug 2021 - May 2025

Gujarat Technological University

- CGPA: 8/10

CERTIFICATIONS

Core Java, Java Enterprise Edition(J2EE), Spring MVC, Spring Boot, Microservices, OCI Generative AI
